

ZULO

COIN

What is a Zulocoin?

This is a unique project that allows people to earn passive income monthly by holding cryptocurrency in a TON network wallet (Tonkeeper etc.)

Usually, to earn passive income, people put their money into staking with a yield of **3-5% APR**.

Zulo gives people the opportunity to achieve a passive income of **10-20% APR**.

Our Goal

To get the ZULO token listed, we need to gather 5-10 million players. You might ask why so few - it's because our players are important to us, and we want them to receive a significant amount of tokens during the airdrop.

What do we need from the TON accelerator?

1

Community

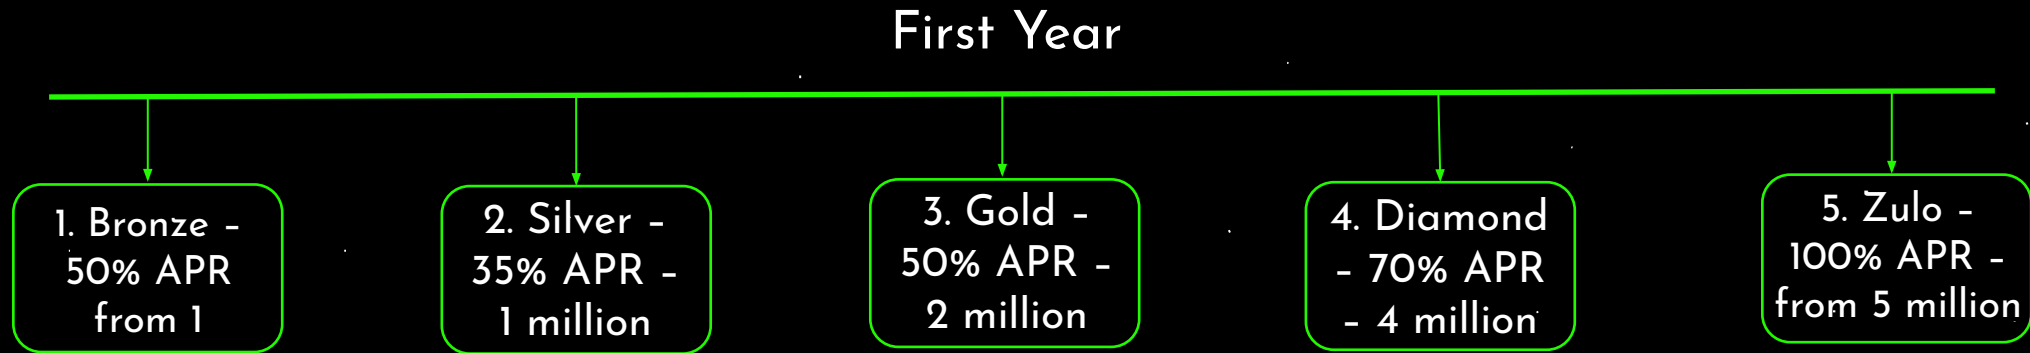

2

Financial investment (\$1,5-3 million)

Exchange, server, and other expenses

Our plan for asset distribution and APR for holders

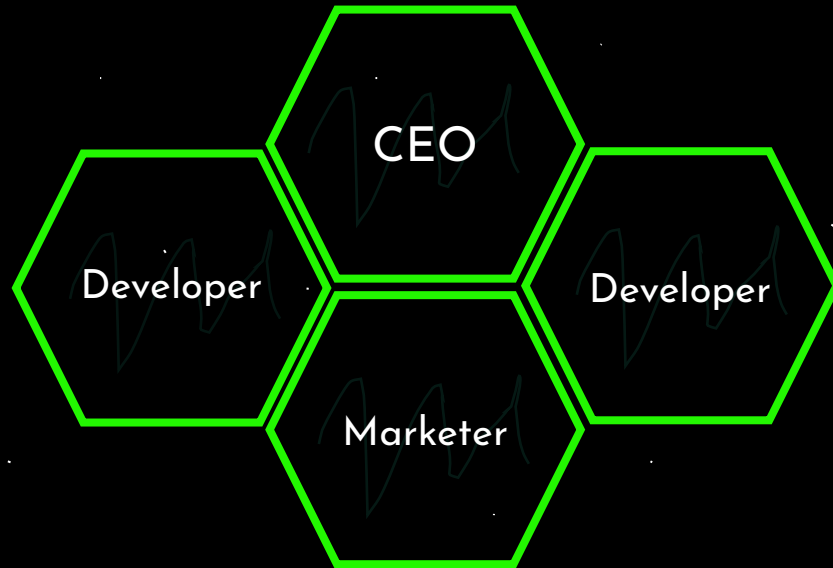

Usually, we offer **10-20% APR** depending on the holder's level. Since we plan to attract new users, we will temporarily increase the annual yield.

In the second year, this rate is halved.
In the third year, the levels will vary from
10-20% APR.

Project Participants

We will supply 1 billion coins.
We will distribute 100 million coins in the airdrop.
On the listing day, we will sell 10 million coins and then every month 10 million coins to invest funds.
We can't sell more than 10 million coins a month as the price will drop.
Each project participant will receive 1 million coins per month on the listing day for a year, totalling 12 million coins.
The remaining coins will stay with the company.
The TON accelerator will receive 50 million coins over 5 years, 10 million per year.

Total emission of 1 billion coins

Each year, 120 million coins are sold at a rate of 10 million per month

Proceeds from sales will be invested in liquidity pools on DEX exchanges with an annual yield of 50-100%.

Trading bots on CEX exchanges for trading spot assets with an annual yield of 50-100%.

We plan to give holders 10-20% APR in regular years depending on the level.
The remaining 40-80% APR will stay in the company's balance.

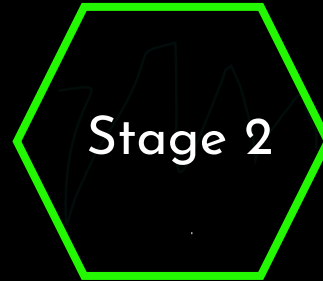

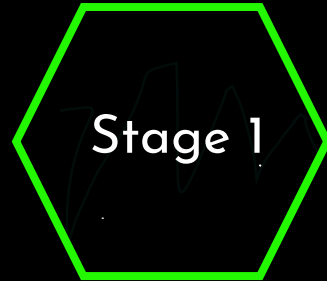

Due to this yield of 40-80% APR, we will conduct an additional emission to provide new coins.
On the listing day, **the price of the coins will be approximately 1 USDT.**

Exchanges

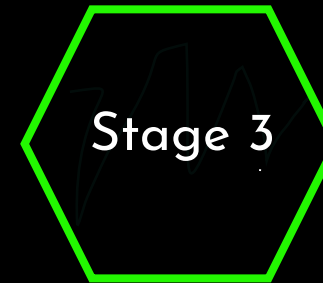

Which exchanges will list?

- Bybit
- OKX
- MEXC
- BingX

- American market:
- Binance
 - Coinbase

- Asian market:
- Kucoin
 - Gate
 - Gemini
 - Bitget

We will work with Marketmakers:

- DWF Labs
- GotBit
